

# 5 easy steps in under 3 months

PTI designed a new clamp-style ball bearing housing to control bearing insert fit for an OEM in just over 2 months.

## 1

### Day 1: Initial Request

Customer first contacted PTI with need for a *new product*.

## 2

### Day 3: All Specs Collected

PTI's engineers *gathered specs* from customer and started a *prototype design*.

## 3

### Day 30: Design Approved

After reviews and design adjustments, a final design was *approved*.

## 4

### Day 33: 3D Printed Model

Using our in-house *3D Printer*, PTI produced a prototype for the customer, which was *quickly approved*.

## 5

### Day 69: Project Complete\*

PTI plant produced the first production samples. Upon receipt, the customer ordered *2,000 units*.

*Contact Us* for more about our custom product capabilities.

\*Please Note: Timeframes for projects vary depending on scope, complexity, and availability.
