

MICROPOLY®

SOLID LUBRICANT FILLED BEARINGS

OPTIMAL PROTECTION

IPTCI Stainless Steel bearings are now available pre-filled with MicroPoly®, a high performance, solid lubricant designed to protect and improve performance of bearings

in challenging applications including extreme temperatures, corrosive environments and in applications with high levels of contamination.

PRODUCT BENEFITS

- » Increased Bearing Life
- » Eliminates Labor Cost to Re-Grease
- » Seals Out Contaminants
- » Reduces Wash-Down Time
- » USA / FDA & HACCP Friendly
- » Cleaner Operation
- » No Grease Purge & No Re-Greasing Required
- » Keeps Grease Out of Your Product & the Environment

SAMPLE APPLICATIONS

- » Food & Beverage
- » Pharmaceutical
- » Low Temp & High Temp Applications
- » Material Handling
- » Highly Contaminated Environments
